

## **Microlinea Recessed Series 3**

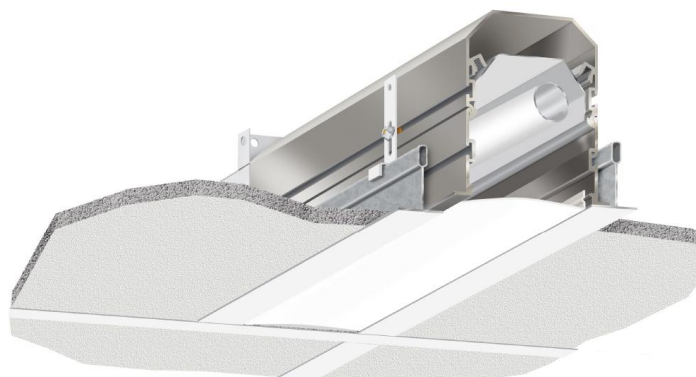

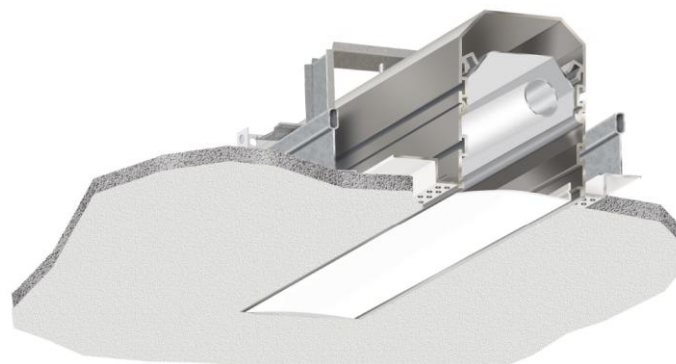

### *New T8 Lamp Version*

---

Responding to the needs of our agents, P.A.L. introduces the latest addition to our product line – a new T8 lamp version of our extremely popular Microlinea Recessed Series 3 fixture. Like the original, the T8 lamp version also features staggered lamping, a full range of snap-in lenses and baffles, and is constructed of rigid yet lightweight extruded aluminum.

Available in a 1-lamp cross-section, the new T8 version accommodates almost any ceiling system. 90 degree horizontal (in-ceiling) lit corners are also available.

This new version has already been added to the Microlinea Recessed page of the P.A.L. website. New catalog pages and a Price Supplement will be mailed to your offices in the next few weeks.

Regards,

**Steve Tortorice**
