

# PAL Architectural is continuing to evolve

The following families are moving:

**Microlinea** – now available as the new Acculine Series

**Quadracell** – now available as Acculine + superior optics added

**Microquad** – available as lasso shapes

PAL will continue to fully support existing projects during the transition of product families and provide guidance on new and ongoing projects.

## New Linear Product Lines

### New Modernized linear

Form factors with cleaner profiles, improved optics, and enhanced performance.

### New and expanded "linear"

Modular families designed for faster specification and simplified integration.
