*For Visual Impact*

RECEPTION

- Small size for minimal footprint in architectural spaces
- Innovative Quad Emitter optical system for more controlled illumination and visual comfort
- Compatible with all popular ceiling types

Introducing the compact QuadraCel series with an innovative lighted-cell optical system that provides more visually appealing illumination.

*Adaptable to many applications, the QuadraCel series (recessed shown above) enhances architectural spaces and provides focused light. QuadraCel's proprietary Quad Emitter Array (shown right) delivers superior efficacy and visual comfort.*

*QuadraCel creates a striking architectural statement.*

- Unique Quad Emitter Array LED design for greater efficacy
- Striking color combinations heighten aesthetic interest
- Recessed, ceiling, suspended and wall mounting options

*For Spectacular Results*

# QUADRACEL

*For Architectural Appeal*

QuadraCel's visual appeal lies in its ability to also offer unlimited baffle and housing colors that match, contrast with or complement each other.

The standard QuadraCel features a choice of white, highly specular and semi-specular baffles.
